"From the moment I heard "Love Journeys" I was convinced that Karen Mitchell (under the production/arrangements and multi-instrument performance by Julian Costas) was destined for a big future in this field. She's now getting nationwide radio airplay, it appears a lot of program hosts agree with me. The CD offers beautiful melodies that touch you at a deep level (and stay with you) Mastery of diverse styles and themes is evident as different tracks feature Contemporary Instrumental, Crossover Classical, World Music and even a Jazz cut. The lush orchestration artfully blend strings, piano, guitar, chimes, percussion, woodwinds. "Angels" includes soaring, wordless vocalizations from Award Winning Soprano Valerie Miller, who has graced movies, TV shows and commercials for years"
